Intended Purpose

The OSA Mask is intended to be used as a patient interface in a non-invasive positive airway pressure (PAP) therapy system to deliver pressurized air from the breathing tube to the patient's upper airway. The patients are intended to be adults weighing ≥ 66 lb (30 kg). The mask is intended to be used for single patient re-use in the home for the treatment of a respiratory condition and multi-patient re-use in a hospital or other clinical setting to investigate the optimal pressure required for the treatment of a respiratory condition.

The specific technical details, contra-indications and warnings are contained in the instructions for use of each device listed on this Declaration
